CUT GREENS:

Incense Cedar

Frequently used in arrangements as an accent because of the distinctive yellow pollen buds at the tips of the bough.

Port Orford Cedar

Our most popular and versatile cedar with short needles and graceful blue-green boughs.

Western Red Cedar

The most economical of the cedars with long, flat, dark green boughs.

Noble Fir

Noted for its stiff, upright needles with a bluish tint. The sturdiness of the bough makes it an ideal base for most consumer ready products.

Silver Fir

Similar shaped bough to Noble Fir but with darker and wider needles. The underside of the needles have a distinct silvery cast.

Douglas Fir

A very pliable and easy to use evergreen with shorter, medium-green needles that surround the stem giving it a softer look and effect.

Princess Pine

Also known as Western White Pine. Popular with designers because of the long, loose, blue-green stems and branches.

Juniper

Berried Oregon Juniper

A pungently scented evergreen with silvery-blue berries from Oregon's desert country.

Cones

A variety of shapes and sizes:

- Sugar Pine, 1"-14"**
- Ponderosa Pine, 3"-5"**
- Lodgepole Pine, 1"-3"**
